PRODUCT CODE:MAFS  
CUSTOMS TARIFF/COMMODITY CODE:3808 5000  
COUNTRY OF ORIGIN:UNITED KINGDOM  
PACKAGING:5, 25, 200 and 1000 Litres

## TECHNICAL INFORMATION SHEET

### Murphy's Anti-fungal Solution - Wall cleaner

#### Description

Murphy's Anti-fungal Solution is a ready-for-use pale amber liquid formulated for use as a "disinfectant wash" for the fabric of buildings.

#### Benefits

- Prevents mould growth
- Provides your walls with an appearance of cleanliness
- Easy ready-for-use solution
- Can be easily applied by brush or spray
- Can be applied to most fabric of building including painted surfaces, plaster, brickwork, masonry, plastics, ceilings, beams and rafters.
- After treatment and drying porous surfaces may be painted over.

#### Applications & Guidelines for use

Before using Murphy's Anti-fungal Solution walls or surfaces should be cleaned first to remove debris and surface mould then allowed to dry before treating with Murphy's Anti-fungal Solution. Before use please take adequate measures to ensure that this product cannot enter the brewing process.

This solution is ready for use and can be applied by brush or spray. If spraying adequate precautions must be taken to ensure good ventilation and to prevent any inhalation of the spray as well as avoiding contact with the skin and eyes. After treatment and drying, porous surfaces may be painted over but it is recommended that a small test patch be tried first to ensure that the paint is not affected by the treatment.

As Murphy's Anti-fungal solution is miscible with water surfaces which are subsequently washed or wet repeatedly we may need re-treatment with the product.

When handling

- **Wear suitable gloves and eye protection.**
- **Wear a respirator if applying by spray.**
- **See product Safety Data Sheet for further information**

#### Specification

COMPOSITION	Aqueous solution of sodium orthophenylphenate
APPEARANCE	Pale amber liquid, ready for use
<u>Analysis</u>	
Specific Gravity @20°C	1.09
Active Content	30% nominal

#### Storage & Shelf life

- Store in cool conditions away from direct sunlight
- Keep in original container
- Keep containers sealed when not in use
- Maximum storage temperature is 15°C
- Recommended storage temperature is 5°C - 14°C
- Minimum storage temperature is 5°C as there could be a risk of crystallization
- Do not allow the product to freeze
- The shelf life at the recommended storage temperature is 6 months from the date of manufacture
