

TECHNICAL INFORMATION SHEET: ALCOTENE SPECIAL

PRODUCT NAME:
ALCOTENE SPECIAL

PRODUCT CODE:
ALCOTS-20K

COMMODITY CODE:
29369000

PACKAGING:
20KG

Description

Alcotene Special is a free flowing white / pale yellow crystalline powder consisting of a carefully formulated blend of soluble inorganic salts, vitamins, amino acids, yeast growth factors and trace elements to improve yeast performance and fermentation by correcting nutrient deficiencies in wort / washes.

Benefits

- Improves rate of yeast growth.
- Prevents slow fermentations
- Useful in low Free Amino Nitrogen worts
- Concentrated Powdered Product, economical in use

Principle

A source of vitamins and trace elements and inorganic nitrogen to avoid fermentation problems such as long lag phase, high pH, sticking fermentations and poor fining performance.

REGULATORY COMPLIANCE INFORMATION

Refer to the **Product Specification Sheet** or contact us on
tel: +44 (0) 115 978 5494 | e: compliance@murphyandson.co.uk

HEALTH & SAFETY INFORMATION

Refer to the **Safety Data Sheet (SDS)**

Application and rates of use

This product can be mixed into the yeast slurry about 30 minutes before pitching. Alternatively, mix with a small volume of wort and add to the fermenter. This product can also be added to the kettle at the end of the boil.

Alcotene Special should be added at a rate of 0.85g to 3.5 g per hl of wort. With regular use, low rates can be effective in maintaining good yeast health and guarding against deficiencies. Over use can result in over-vigorous fermentations.

Guidelines for use

- Check that the product is within its shelf life before use
- Carry out optimisation trials to obtain ideal dose rate
- Read the Safety Data Sheet prior to use
- For more information on the composition of this product please see the Product Specification

Storage and Shelf life

- Store in cool dry condition in original container
- Keep containers sealed when not in use
- Shelf life is 2 years from the date of manufacture if stored correctly
