

HYGIENE

# ANTIFORMIN S PCD

TECHNICAL DATA SHEET

## Description

Antiformin S Pipe Cleaning Detergent (PCD) is a combined caustic/chlorine detergent specifically formulated for the cleaning of beer lines. This product also contains a sequesterant making it suitable for use in hard water areas.

## Benefits

- Chlorinated formulation which disinfects efficiently
- High quality formulation cleans even badly soiled beer lines
- Ideal for use in hard water areas
- Suitable for use on stainless steel, copper and plastics

## Principle

Antiformin S PDC is a food safe concentrated liquid detergent/disinfectant solution and probably the most universally used and effective branded product of its type in the brewing industry. It is uniquely formulated for use in beer lines to give a stable, powerful cleaning and disinfecting action and is easily rinsed.

### PRODUCT CODE

ANTSPDC

### COMMODITY CODE

28151200

### PACKAGING (kg)

10 kg (2 x 5kg)

### STORAGE

Keep in original container.

Keep containers sealed when not in use.

### Temperature

Recommended storage temperature is 10°C.

Maximum storage temperature 15°C.

Do not allow the product to freeze.

### Location

Store in cool conditions away from direct sunlight.

### Shelf Life

At the recommended storage conditions, three months from date of manufacture. (min. 95% retention of available chlorine). Beyond this, a loss of chlorine content will occur.

## Application and Rates of Use

Prepare a solution by mixing the product with cold water at a ratio of 1 part to 40 (25 mL/L). For heavy soiling, use a 1 part to 20 solution (50 mL/L).

Fill the pipes and system with the solution and leave to soak for at least 20 minutes, depending on the level of soiling.

After soaking, **thoroughly** rinse the pipes and system with clean cold water.

This cleaning procedure should be repeated at least weekly.

## Guideline for use

- Check that the product is within its shelf life before use
- Contact time is 20 minutes
- **Do not mix with acids**
- Do not use on aluminium, zinc, brass or galvanised surfaces
- Do not use a concentration >2.5% on stainless steel surfaces
- Do not exceed temperatures of 50°C as rate of chlorine loss will accelerate markedly
- Read the Safety Data Sheet prior to use
