

TECHNICAL INFORMATION SHEET: NUTROMIX POWDER - YEAST NUTRIENT

PRODUCT NAME: Description
NUTROMIX
PRODUCT CODE: Nutromix is a blend of nutrients and trace elements formulated
NUT to correct nutrient deficiencies in wort and aid fermentation.

COMMODITY CODE: Benefits
29369000

- Improves rate of yeast growth.
- Prevents slow fermentations
- Useful in low nitrogen worts
- Concentrated powder product, economical in use

PACKAGING: Guidelines for use
25 KG

- Check that the product is within its shelf life before use
- Carry out optimisation trials to obtain ideal dosage rates for the best results
- Do not add too much of the product or over-vigorous fermentation will result
- Read the Safety Data Sheet prior to use

HEALTH & SAFETY INFORMATION

Refer to the **Safety Data Sheet (SDS)**

Application and rates of use

The product should be added at a rate of between of 3 and 5 g per hectolitre of wort. A suitable starting point would be 4 g per hectolitre. A high rate may be required for a short period, after which the rate of addition can be significantly reduced. With regular use, low rates can be effective in preventing nutrient deficiencies. Addition of quantities in large excess of this may exceed the permitted limits for zinc and manganese.

The product can be mixed into the yeast slurry about 30 minutes before pitching into the wort, or alternatively mixed with a small volume of wort and added to the fermenter. It can also be added to the kettle at the end of the boil. If dried yeast is used the product should NOT be mixed with the yeast whilst it is being reconstituted.

Storage and shelf life

- Store in cool conditions away from direct sunlight
- Keep in original container
- Keep containers sealed when not in use
- The shelf life at the recommended storage conditions is at least two years
