

## NUTRIENTS

# NUTROMIX POWDER

## TECHNICAL DATA SHEET

## Description

Nutromix is a blend of nutrients and trace elements (including zinc) formulated to correct nutrient deficiencies in wort and aid fermentation.

## Benefits

- Improves rate of yeast growth
- Prevents slow fermentations
- Useful in low nitrogen worts
- Concentrated powder product, economical in use

### PRODUCT CODE

NUT

### COMMODITY CODE

29369000

### PACKAGING (kg)

25 kg

### STORAGE

Keep in original container.  
Keep containers sealed when not in use.

### Temperature

Recommended storage temperature is 5°C - 25°C.

### Location

Store in cool conditions away from direct sunlight.

### Shelf Life

At the recommended storage conditions, two years from date of manufacture.

## Application & Rates of Use

The product should be added at a rate of 3 to 5 g/hL of wort. Adding quantities significantly above this range may exceed the permissible limits for zinc and manganese.

For optimal mixing, the product can be incorporated into the yeast slurry approximately 30 minutes before pitching into the wort. Alternatively, it can be mixed with a small volume of wort and then added to the fermenter. If using dried yeast, do NOT mix the product with the yeast during rehydration.

## Guidelines For Use

- Check that the product is within its shelf life before use
- Carry out optimisation trials to obtain ideal dosage rates for the best results.
- Do not add too much of the product or over-vigorous fermentation will result
- Read the Safety Data Sheet prior to use
