

TECHNICAL INFORMATION SHEET: SEQUESTRANT ADDITIVE

PRODUCT NAME:
SEQUESTRANT
ADDITIVE

PRODUCT CODE:
SADD

COMMODITY CODE:
29212100

PACKAGING:
25 KG

Description

Sequestrant additive is a clear colourless liquid made from approved sequestering agents for use with Antiformin or caustic solutions in areas of hard water. This will prevent the build up of scale in fermenting vessels and pipework, thus reducing the amount of descaling with acid cleaners.

Application and rates of use

Sequestrant Additive should be used at a rate of 0.2% v/v in the liquor prior to the addition of Antiformin or caustic (at a rate of 1–2%). This compliments the existing sequestering powers of Antiformin, enhancing its cleaning and scale removing properties and preventing mineral deposits from high carbonate water supplies.

HEALTH & SAFETY INFORMATION

Refer to the **Safety Data Sheet (SDS)**

Storage and shelf life

- Store in cool conditions, away from direct sunlight
- Keep containers sealed when not in use
- Maximum storage temperature 30°C
- Recommended storage temperature 10 to 15°C
- Minimum storage temperature - not applicable
- The shelf life at the recommended storage temperature is two years from date of manufacture
