

## TECHNICAL INFORMATION SHEET:

**PRODUCT NAME:****Pristine PRO****PRODUCT CODE:****COMMODITY CODE:****28112200****PACKAGING:****20Kg**

### Description

Pristine PRO is a silica hydrogel designed for removing protein causing haze from beer. It can be used on its own or in combination with Pristine PVPP which removes polyphenols.

### Benefits

- Protects against chill and permanent haze
- Dust free handling
- No negative impact on foam stability
- No negative impact on flavour
- Compatible with all filtration techniques

#### HEALTH & SAFETY INFORMATION

## Guidelines for use

Pristine PRO works best when added to the kieselguhr dosing vessel along with the filter powder.

Pristine Pro typically requires 5-10 minutes hydration time before use.

## Application

Add to the kieselguhr slurry at the second pre-coat. We recommend 50g/m<sup>2</sup> filter area.

Required contact time is 5-7minutes.

Depending on the required stability between 50 - 120g/hl should be used.

## Storage & shelf life

- Pristine PRO should be stored in cool, dry conditions and is best used within 2 years of manufacture.
- Please read the Safety Data Sheets before use
