**PRESERVATIVES & STABILISERS**

PRISTINE PRO

TECHNICAL DATA SHEET

Description

Pristine PRO is a silica hydrogel specifically formulated to remove haze-causing proteins in beer. It can be used alone or in combination with Pristine PVPP, which targets polyphenol removal for enhanced clarity and stability.

Benefits

- Protects against chill and permanent haze
- Dust free handling
- No negative impact on foam stability
- No negative impact on flavour
- Compatible with all filtration techniques

PRODUCT CODE

PRISTINE-PRO-20K

COMMODITY CODE

28112200

PACKAGING (kg)

20 kg

STORAGE

Temperature

Recommended storage temperature is 5°C - 14°C.

Do not allow the product to freeze.

Location

Store in cool conditions away from direct sunlight.

Shelf Life

At the recommended storage conditions, two years from date of manufacture.

Application & Rates of Use

Pristine PRO works best when added to the kieselguhr dosing vessel along with the filter powder. Pristine Pro typically requires 5-10 minutes hydration time before use. Add to the kieselguhr slurry at the second pre-coat. We recommend 50g/m² filter area.

Required contact time is 5-7 minutes.

Depending on the desired stability, a dosage of 50-120 g/hL is recommended.

Guidelines For Use

- Check that the product is within its shelf life before use
- Read the Safety Data Sheet prior to use
