HEALTH & SAFETY INFORMATION

Refer to the **Safety Data Sheet (SDS)**

boiling kettles, hops strainer and many other areas. It is suitable for stainless steel and can be used at high temperatures (max temp being 80°C).

This product is ideal for the removal of protein, dextrin, gum cellulose, hemicelloses, mucilage, pectin, tannin and mineral salt deposition and scaling.

Guidelines for use

- Check that the product is within its shelf life before use,
- Care should be taken to avoid contact with eyes and skin by the use of suitable gloves and goggles
- In case of contact with skin or eyes wash with plenty of water
- Read the Safety Data Sheet prior to use
- Wash spillages to drain with plenty of water
- It is not suitable for use on aluminium, zinc, tin or their alloys

Application and rates of use

Caustic Soda Liquor 70 Tw is 32% sodium hydroxide and should be added to water to give a final concentration as caustic of 1-2%. Therefore three to six litres of Caustic Soda Liquor 70 Tw per hl of water is required.

Where hardness of water is greater than 200 mg/litre as CaCO₃, an additional sequesterant may be required to provide the necessary sequestering power such as Murphy's Sequesterant Additive, please ask our sales team for more information regarding this product or if you are interested in having your water hardness tested.
