

MALOVIT B

Fermentation activator for difficult white wines

APPLICATIONS

MALOVIT B is an activator developed to improve fermentability of Chardonnay wines.

MALOVIT B efficiently compensates for the natural deficiencies of Chardonnay with regard to certain amino acids essential for successful microorganisms development.

MALOVIT B is a fermentation activator whose formulation is designed to improve the growth and viability of selected microorganisms after their inoculation into the tank.

MALOVIT B helps to ensure the safe and rapid completion of fermentations.

MALOVIT B is recommended for preventive use.

DOSAGE

Recommended dosage: 20 to 30 g/hL.

INSTRUCTIONS FOR USE

Make up a suspension of 1 kg of **MALOVIT B** in 10 L of water.

Stir for 2-3 minutes.

Add to the tank during pump-over to ensure the product is well distributed.

Add **MALOVIT B** immediately before inoculation with selected microorganisms.

Precautions for use:

Product for oenological and specifically professional use.

Use in accordance with current regulations.

PACKAGING

500 g bags

2.5 kg bags

STORAGE

Store unopened, sealed packaging away from light in a dry, odour-free environment.

Once opened use rapidly.
