

FININGS

SUPER F

TECHNICAL DATA SHEET

Description

SUPER F is a blended formulation that has been specifically designed for the rapid sedimentation of yeast, protein and other haze forming particles resulting in bright, clear beer.

Benefits

- Helps achieve excellent beer clarity
- Vegan friendly product
- Rapid action finings to be used in maturation and conditioning tank
- Low dosage rates, concentrated formulation
- Super F is stable at ambient temperatures
- Suitable for breweries worldwide

PRODUCT CODE

MS_SF

COMMODITY CODE

38249996

PACKAGING (kg)

5, 25, 200 & 1225 kg

STORAGE

Keep in original container.

Keep containers sealed when not in use.

Temperature

Recommended storage temperature is 4°C - 30°C.

Do not allow the product to freeze.

Location

Store in cool, dry place away from direct sunlight.

SHELF LIFE

At recommended storage conditions, 9 months from the date of manufacture.

Application and Rates of Use

Super F can be added directly to DPV or during transfer of beer from fermentation vessel (FV) to conditioning tank. It can also be added directly to cask.

Rates of use:

Super F is best added when the beer is finished fermenting and has already been cold crashed—either added during transfer or direct to tank. Action of this fining is quite rapid with excellent results achievable within 48 hours. Best results achieved at 5°C.

Rates of addition are typically within the range of 70-200mL per hectolitre of beer. The exact rate will depend upon whether or not kettle finings have been used in the brewhouse, the addition of auxiliary finings, the degree of yeast flocculation, yeast count, pH, temperature and the residence time on chill at the end of fermentation and the strength of the beer. Optimisations should be carried out to determine the dosage rates more accurately.

Guidance for Use

- Check that the product is within its shelf life before use
- Read the Safety Data Sheet prior to use
